

Name:

1. Finish the statements.

Transform the sentences.

1. People say that Susan is very fit.

It is said...

Susan is said...

2. They say that the Queen has already decided.

It is said...

The Queen is said...

3. Doctors expect he will recover soon.

It is expected...

He is expected...

4. They say he is feeling better.

It is said...

He is said...

5. They believe he was working illegally.

It is believed...

He is believed...

6. People know she was always late for work.

It is known...

She is known...

7. They reported that the Royal couple had left the palace.

It was reported...

The Royal couple was reported...

8. People thought that the bride had been cheating him.

It was thought...

The bride was thought...

2. Rewrite the sentences using the structure: have something done.

1. The mechanic changed the tyre of my car.

2. The dentist is going to check the boy's teeth.

3. A professional painter has painted our house.

4. The electrician will fix the problem of our wiring.

5. The vet vaccinates my dog.

6. The architect has designed my new house.

7. The optician had tested my mum's eyes.

8. The hairdresser cuts your hair.

9. A specialist cleaner will clean your coat.

10. A new company organised our last party.

3. Rewrite the sentences using Conditional Structures.

1. He can't go out because he has to study for his exam.
→ If
2. She is lazy, so she can't pass the exam.
→ If
3. He smokes too much; that's why he can't get rid of his cough.
→ If
4. I can't play football this afternoon because I felt tired.
→ If
5. Olga and Ivan weren't paying attention, so they didn't see the sign marking their exit from the highway.
→ If
6. She can't be employed because she doesn't have a college degree.
→ If
7. She walked to the meeting. She was late.
→ If
8. Unless you promise to return back, I won't lend you.
→ If
9. We put off our trip because the weather was terrible.
→ If
10. Sally doesn't know what she has to do for homework because she was absent from school on Friday.
→ If

4.

84

Complete the sentences using the words in bold. Use two to five words.

- 1 I didn't tell her the bad news. I didn't want to upset her.
avoid I didn't tell her the bad news ...to avoid upsetting... her.
- 2 Mary wrote out a shopping list. She didn't want to forget anything.
that Mary wrote out a shopping list forget anything.
- 3 Paul trained hard every day. He wanted to be the best.
as Paul trained hard every day the best.
- 4 Lee gave up her job. She planned to continue her education.
view Lee gave up her job her education.
- 5 She turned the oven down. She didn't want to burn the cakes.
might She turned the oven down burn the cakes.
- 6 He was saving all his money. He intended to buy a house.
aim He was saving all his money a house.
- 7 Peter left the office early. He wanted to be at the cinema on time.
in Peter left the office early at the cinema on time.
- 8 This is a pencil sharpener. You use it to sharpen pencils.
for This is a pencil sharpener. It is used pencils.
- 9 I'll bring a pack of cards. We might want to play later.
case I'll bring a pack of cards play later.
- 10 We didn't want to get stuck in a traffic jam so we bypassed the city centre.
avoid We bypassed the city centre in a traffic jam.

5. Use Reported Question

- a) 'What time does the film start, Peter?'
I asked ~~Peter what time the film started~~
- b) 'Do you watch television every evening, Chris?'
The interviewer asked
- c) 'Why did you apply for this job?' asked the sales manager.
The sales manager asked me
- d) 'Are you taking much money with you to France?'
My bank manager wanted to know
- e) 'When will I know the results of the examination?'
Maria asked the examiner
- f) 'Are you enjoying your flight?'
The stewardess asked me
- g) 'How does the photocopier work?'
I asked the salesman
- h) 'Have you ever been to Japan, Paul?'
Sue asked Paul

6. A) Choose the option that best completes each sentence.

- 1. A system becomes **vulnerable** primarily when: a) its hardware is outdated but software is current b) its security layers contain exploitable weaknesses c) its bandwidth exceeds its storage capacity d) its interface is overly user-friendly
- 2. A **state-of-the-art** solution is one that: a) prioritises backward compatibility b) uses the most advanced technology available c) avoids automation to reduce risk d) sacrifices efficiency for stability
- 3. A **dedicated server** is often chosen by organisations that require: a) minimal control over configuration b) predictable performance and isolation c) the lowest possible hosting cost d) limited access to system resources
- 4. A **CMS** becomes inefficient when: a) its database queries are poorly optimised b) its interface is too intuitive c) its hosting plan includes unlimited bandwidth d) its content is mostly static
- 5. A **driver conflict** typically results in: a) increased network throughput b) hardware malfunction or instability c) improved system responsiveness d) reduced memory consumption

B) Match A–F to 6–11.

A. scalability B. redundancy C. latency D. interoperability E. throughput F. virtualisation

- 6. ___ The ability of systems to communicate and operate together.
- 7. ___ The delay between a request and its response.
- 8. ___ The capacity of a system to handle increased workload.
- 9. ___ The duplication of critical components to ensure reliability.
- 10. ___ The total volume of data processed in a given time.
- 11. ___ The creation of simulated computing environments.

C) Use the words: **accessibility, alignment, rendering, responsive, deprecated, optimisation, cluttered, scalability**

- 12. The interface appears _____ on mobile devices, suggesting poor CSS adaptation.
- 13. Several functions rely on _____ code that should no longer be used.

14. The homepage is visually _____, reducing user comprehension.
15. Image _____ significantly affects loading speed.
16. Proper text _____ is essential for readability.
17. The system's long-term viability depends on its _____.
18. The site's _____ features must comply with international standards.
19. Slow _____ of dynamic elements indicates inefficient scripting.

D) Choose the correct option.

20. A **seamless** integration between systems implies: a) the transition is invisible to the user
b) the systems require manual synchronisation c) the interface is intentionally complex d) the performance is unpredictable
21. A **clunky** application is typically: a) elegant and intuitive b) secure but unstable c) lightweight and efficient d) outdated and awkward to use
22. A **sophisticated** algorithm is one that: a) performs only basic operations b) is simple to implement but slow c) uses advanced logic to solve complex problems d) avoids automation entirely
23. A **versatile** system is valued because it: a) performs only one task extremely well b) adapts to multiple functions and environments c) requires minimal user training d) cannot be integrated with other systems
24. A **buggy** release is characterised by: a) high reliability b) seamless performance c) strong encryption d) frequent errors and instability

E) Listening – choose the correct option.

25. The central theme of the passage is: a) the decline of traditional programming languages
b) the evolution of IT infrastructure and workforce demands c) the replacement of human workers by robots d) the advantages of outdated hosting models
26. Shared hosting becomes problematic when: a) traffic increases b) redundancy is added c) automation is introduced d) software is updated
27. Dedicated servers lack: a) predictable performance b) security features c) elasticity for rapid scaling d) compatibility with virtualisation
28. Outdated software can: a) improve throughput b) create bottlenecks c) reduce latency d) increase redundancy
29. Automation requires workers to: a) avoid interacting with complex systems b) rely solely on manual tasks c) eliminate interoperability d) manage and interpret advanced processes
30. The speaker suggests that the main challenge is: a) adopting as many new technologies as possible
b) integrating new technologies intelligently c) eliminating cloud-based systems d) reducing redundancy

F) Listening – True/False

31. ___ Shared hosting is described as cost-effective.
32. ___ Dedicated servers are ideal for rapid scaling.
33. ___ Outdated software can undermine system performance.
34. ___ Automation eliminates the need for skilled workers.
35. ___ Long-term resilience requires thoughtful integration of technology.

ANSWER KEY — C1/C2 Achievement Test

SECTION A — ADVANCED VOCABULARY

Task 1 — High-level IT Lexis

1. **b**
2. **b**
3. **b**
4. **a**
5. **b**

Task 2 — Precision Vocabulary (Matching)

6. **D — interoperability**
7. **C — latency**
8. **A — scalability**
9. **B — redundancy**
10. **E — throughput**
11. **F — virtualisation**

Task 3 — Web Architecture & Design (Gap-fill)

12. **responsive**
13. **deprecated**
14. **cluttered**
15. **optimisation**
16. **alignment**
17. **scalability**
18. **accessibility**
19. **rendering**

Task 4 — Advanced Describing Technology

- 20. **a**
- 21. **d**
- 22. **c**
- 23. **b**
- 24. **d**

SECTION B — LISTENING TEST

Task 1 — Listening for Gist

- 25. **b**

Task 2 — Listening for Detail

- 26. **a**
- 27. **c**
- 28. **b**
- 29. **d**
- 30. **b**

Task 3 — True / False

- 31. **True**
- 32. **False**
- 33. **True**
- 34. **False**
- 35. **True**
